audio-visual environments. Designed for maximum versatility, this kit ensures you have the necessary connections for both modern digital displays and legacy hardware, making it an ideal choice for corporate boardrooms, educational facilities, and collaborative workspaces. Each kit includes an extensive selection of modular connections: HDMI and VGA for video, 3.5mm for audio, and a USB 2.0 Type B module for peripheral connectivity. Additionally, an extra USB 2.0 Type A module is included to provide further flexibility based on your specific requirements. The staggered arrangement of cable exits is a standout feature, as it offsets the termination points to provide significantly more room for manoeuvring cables, making the installation process inside the wall cavity far easier and more efficient.
